Software Implementation Services

Equinox offers a complete range of lab implementation services on any software platform of your choice. These services may include:

- New implementation for greenfield labs, for both onsite or cloud versions
- Upgrade to the latest version
- Migration from one LIMS to another
- Driving ISO 17025 compliance for your existing LIMS
- Roll out / Extension to new labs / plants
- Training – Admin and User
- Application Support services, including on-site/resident engineer

on **LABWORKS, LABVANTAGE, LABWARE, OASYS, CALIBER, HONEYWELL**to name a few lab applications.

ERP/Third Party Tool Integration

Whatever be your ERP - **SAP** or **JDE** or **Oracle**, we are prepared to link your existing LIMS application with your ERP and file-based interface with any plant automation tools.

DCS/Historian Integration

Make your Operators and Engineers see the correlation between your Quality data and the Operating Conditions. Help them see the plant and lab data together via a LIMS – Historian integration. The Historian could be any industry standard platform like, **OSI PI, Honeywell PHD, Aspen InfoPlus.21, Yokogawa ExaQuantum, Schneider Wonderware**.

Customized Report Development, including multi-lingual reporting

The reporting needs differ from person to person. And also from time to time. Don't panic!! Allow us to re-design your report, the way you want them to look and feel!!

Web Publication

Make your Quality data available to your users across the enterprise, through a web portal / Intranet

Instrument Integration with ERP

You do not have any LIMS! No Problem!! We will interface your lab analytical instruments directly with your ERP – **SAP / JDE / Oracle**
